PERSONAL SUMMARY

Graduate of computer science with experience in Python and full stack web development. I have 4 years of programming with Python and full stack web development including the use of web frameworks such as Vue and React. In order to successfully fill the software developer role, I aim to strengthen my current knowledge of web development, database design and management, and data analysis. Thus I am looking for posts that would grant me the opportunity to grow and learn from more experienced members of the company.
